

School Expansion Update

Edition 10

13th December 2019

Apologies for the rather minimal updates recently, however as you can imagine, there is a great deal of preparatory work which needs to take place. Ground levelling work continues and the foundations for the new hall have been completed. Digging out for the road way and car park has commenced and this will continue into next week. The steel uprights are due to be delivered next week weather depending.

More next week.

Best wishes
Sam Porter
