

School Expansion Update

Edition 14

24th January 2020

Unfortunately, the recent weeks' updates have been rather short and this is the case once again. As explained at the start of the project, we made a commitment to report each week on developments even when works continued for prolonged periods.

Next week, masonry work continues and floors for the hall and kitchen are being prepped. Utilities works are continuing on the field and preparation for car parking bays.

More next week.

Best wishes
Sam Porter
