

## School Expansion Update

### Edition 15

*31st January 2020*

On Tuesday 4<sup>th</sup> February, works will commence on the hall and kitchen floors. Concrete will be delivered to the site and a pour will commence before the start of the school day. Contractors have arranged for deliveries to continue to take place outside of drop off and pick times, however I would ask that all parents support us by exiting the school site as promptly as possible on this day – thank you.

Once the trowelling process commences, it must continue until complete. Although this is a one day process, it will be a long day. This may mean that work continues into the evening and whilst there will be no noise disturbance, lighting will be necessary.

Works to the new car park will continue into next week.

More next week.

Best wishes  
Sam Porter
