

## School Expansion Update

### Edition 16

*7<sup>th</sup> February 2020*

As you may have seen, the concrete base in what will be the new hall is complete. Work did continue into the late evening however everything went according to plan. Block laying to the external walls and ramp area has been commenced.

Digging has moved further into the field now and will eventually become the MUGA (multi use games area) and a base course of tarmac has been laid to the parking area. Perimeter scaffolding to the hall will be installed next week and preliminary works to the hall roof will commence.

Please do check the boards which are up at the entrance of the construction site for further information generated by Speller Metcalfe.

More next week.

Best wishes  
Sam Porter
